I'm a product designer who uses AI-assisted development to take work from concept to deployed product. My strongest work is on products where the starting point is ambiguous, the systems are outdated, and the job is to bring clarity and real purpose to both. I'm looking for a senior or staff IC role where closing the gap between design and production is valued.

Professional Experience

Senior Services of South Sound (Remote) • Amsterdam, Netherlands, Nov 2025 - Current

Freelance Product Designer

- Designed and built a compliance training portal for a US nonprofit using AI-assisted development, brief to production
- Replaced 8 hours of monthly manual HR work with automated tracking
- Shipped automated notifications and audit-ready export for compliance records
- Delivered with full technical handover documentation at \$0/month

Flexport • Amsterdam, Netherlands, Jan 2022 - Jul 2025 (3 yrs 7 mos)

Staff Product Designer • Mar 2024 - Jul 2025

- Sole designer on the 0→1 transition to an automation-first customs platform, supporting ~20 engineers
- Operator capacity more than doubled (50 → 110 invoices/day)
- "Commercial invoice not keyed" exceptions fell 71% year-over-year (526 → 152)
- ISF filings began processing automatically, saving 11.5 minutes per shipment
- Pilot client's full volume enrolled in CI digitization by mid-2025
- Planned and facilitated a week-long onsite UAT ahead of scale

Senior Product Designer • Jan 2022 - Mar 2024

- Designed a financial MVP reconciling shipment costs and revenue for importers
- Mapped complex accounting rules to replace manual data entry with automation
- Delivered a high-fidelity interface designed for total financial transparency

Booking.com • Amsterdam, Netherlands, Jun 2016 - Dec 2021 (5 yrs 7 mos)

Design Manager • Oct 2021 - Dec 2021

- Managed and mentored 6 designers during a design org transition

Lead Designer • Jan 2019 - Sep 2021

- Led a North Star vision for the global traveler experience to align product teams
- Bridged traveler needs with long-term business goals in a high-fidelity experience
- Directly informed the multi-year roadmap around a shared vision

Senior Product Designer • Jun 2016 - Dec 2018

- Designed a 0→1 B2B SaaS platform for rate intelligence for independent hoteliers
- Replaced manual spreadsheets with automated competitor benchmarking
- Enabled small merchants to make faster, data-driven pricing decisions

IBM Watson • Austin, Texas, Mar 2014 - Jun 2016 (2 yrs 4 mos)

Software Product Designer

- Established the design language across Watson Conversation and NLP Classifier
- Owned the design system and contributed to UX direction across the AI portfolio

Skills

- **Product & Experience Strategy:** 0→1 Product Development, Enterprise UX, B2B SaaS, B2C, Product Strategy, Cross-functional Collaboration, Systems Thinking
- **Systems Design & Execution:** AI-Assisted Development, Design Systems, Information Architecture, Interaction Design, Visual Design, Prototyping
- **Research & Validation:** Experimentation, Data-Driven Design, Rapid Prototyping, Usability Testing, User Research & Synthesis
- **Tools:** Figma, Adobe Creative Suite, GitHub, Claude Code, Lovable, HTML/CSS, WCAG

Education

University of Northern Iowa • Cedar Falls, Iowa, Dec 2005

Bachelor of Arts in Studio Art, Minor in Graphic Communications

Certificates

Nielsen Norman Group UX Certified • Amsterdam, Netherlands, Jun 2018

Analytics and User Experience
